

Supplementary Figure 3 — Genome-wide chromatin accessibility in LUAD systems

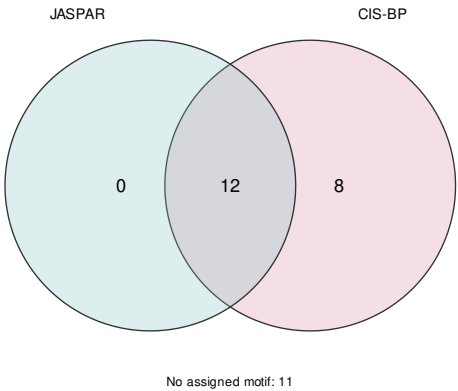

Supplementary Figure 4A–C — LUAD HC-TF evidence accounting

A — Frozen chromatin/TF filtering flow

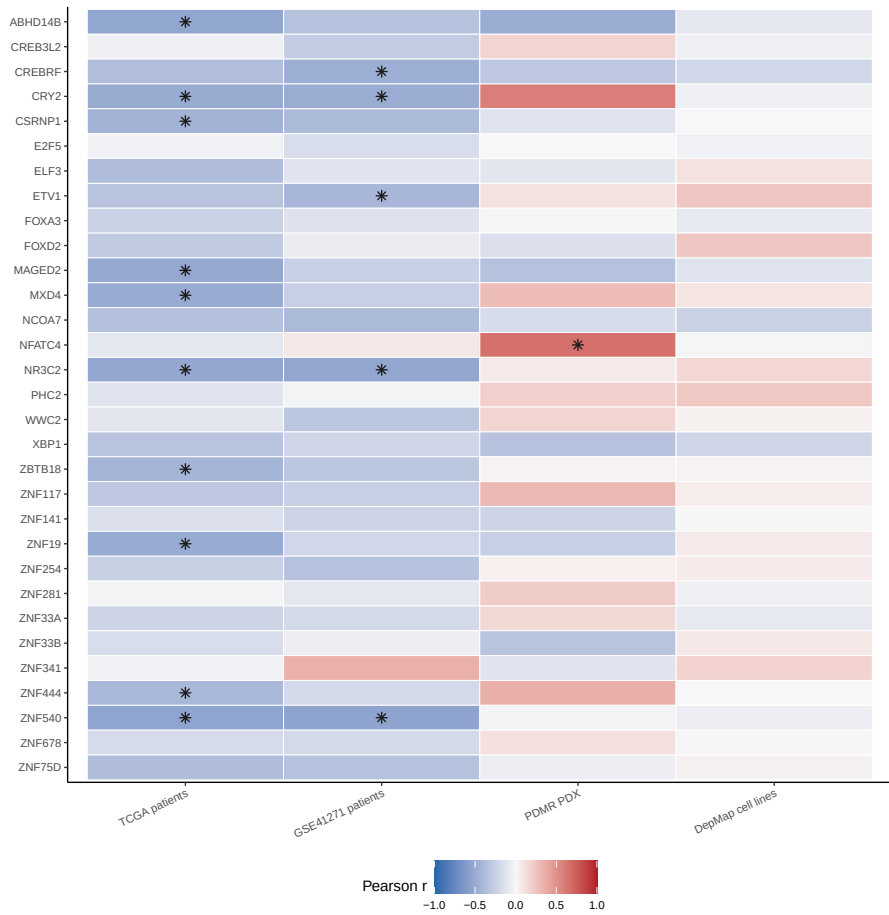

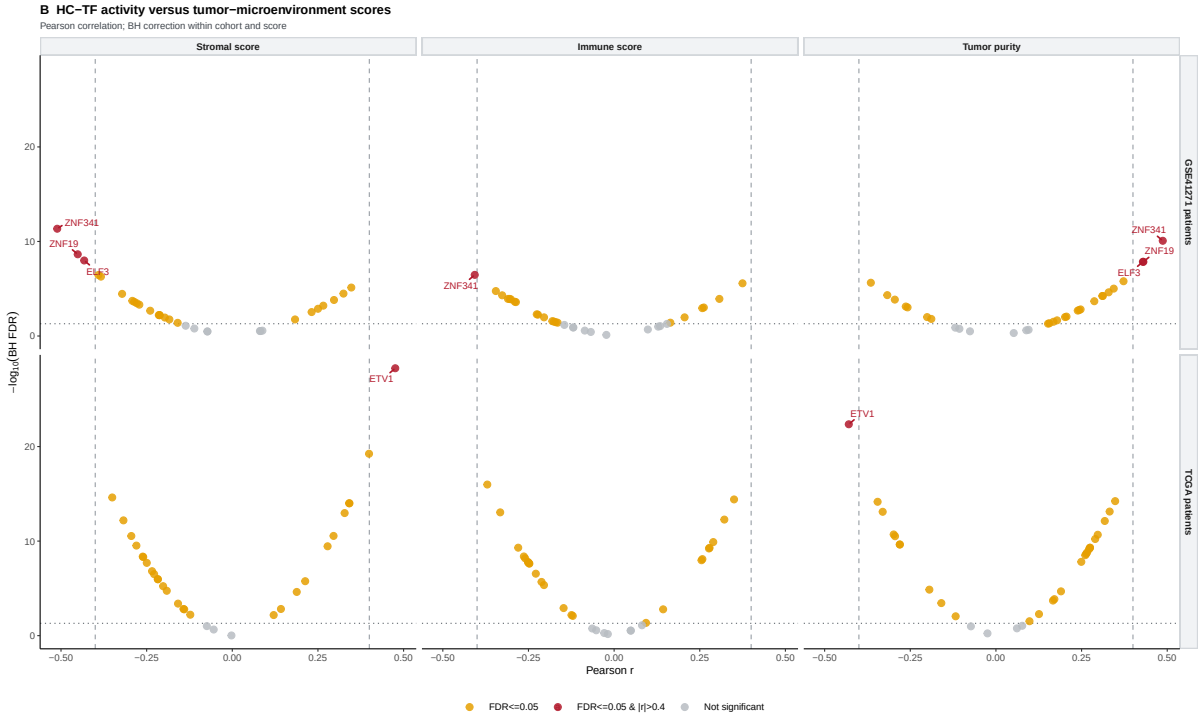

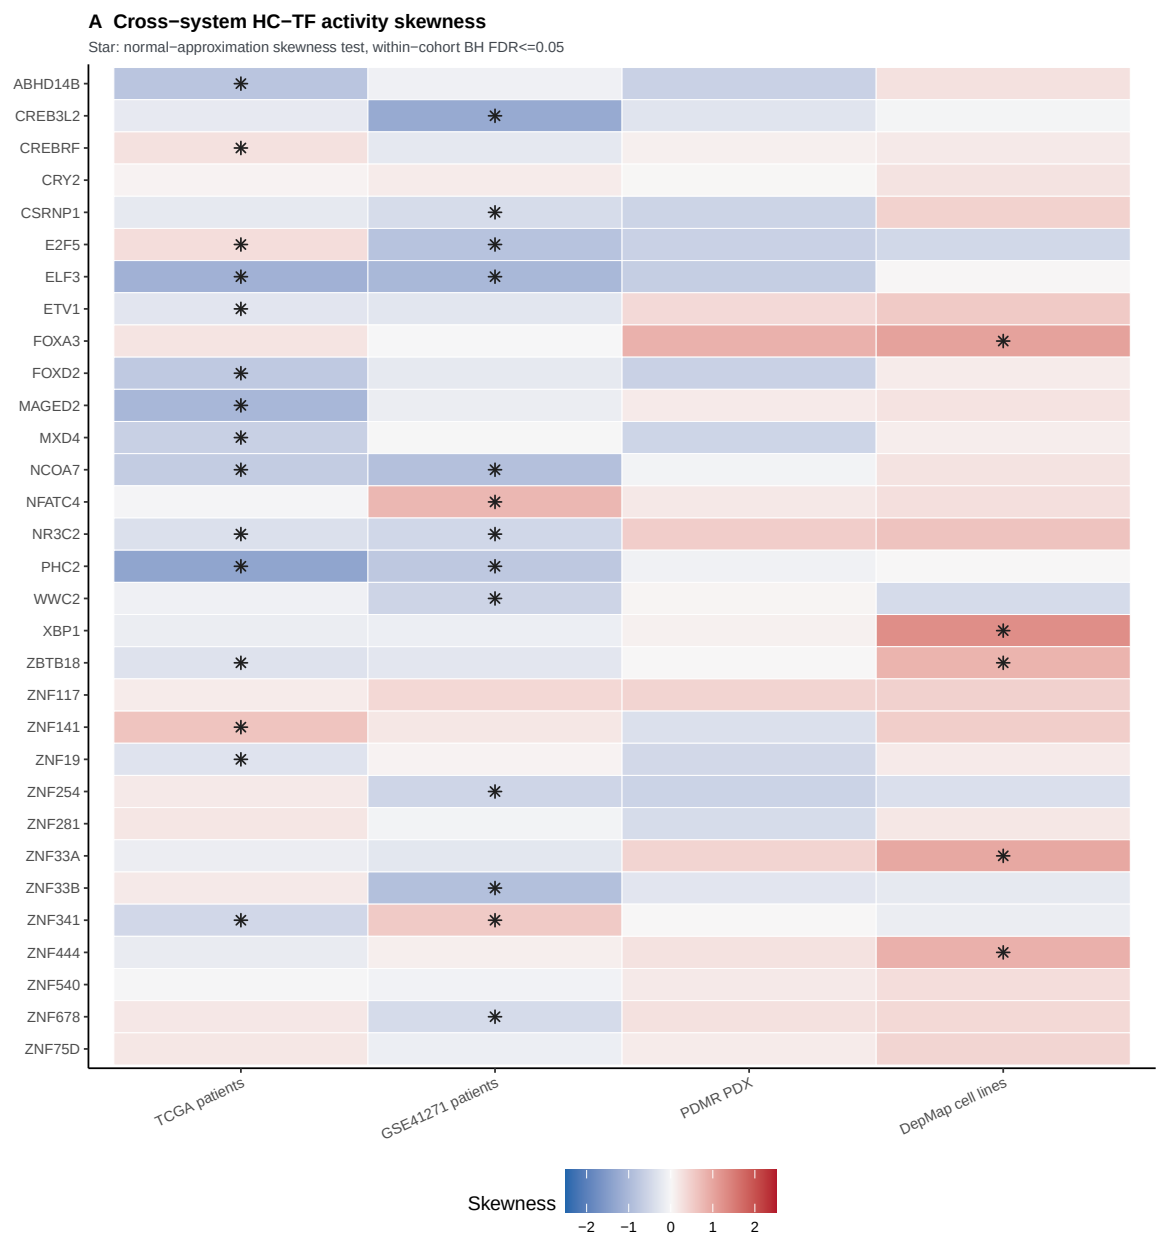

C — HC-TF DNA motif availability

D HC-TF activity versus MKI67 expression

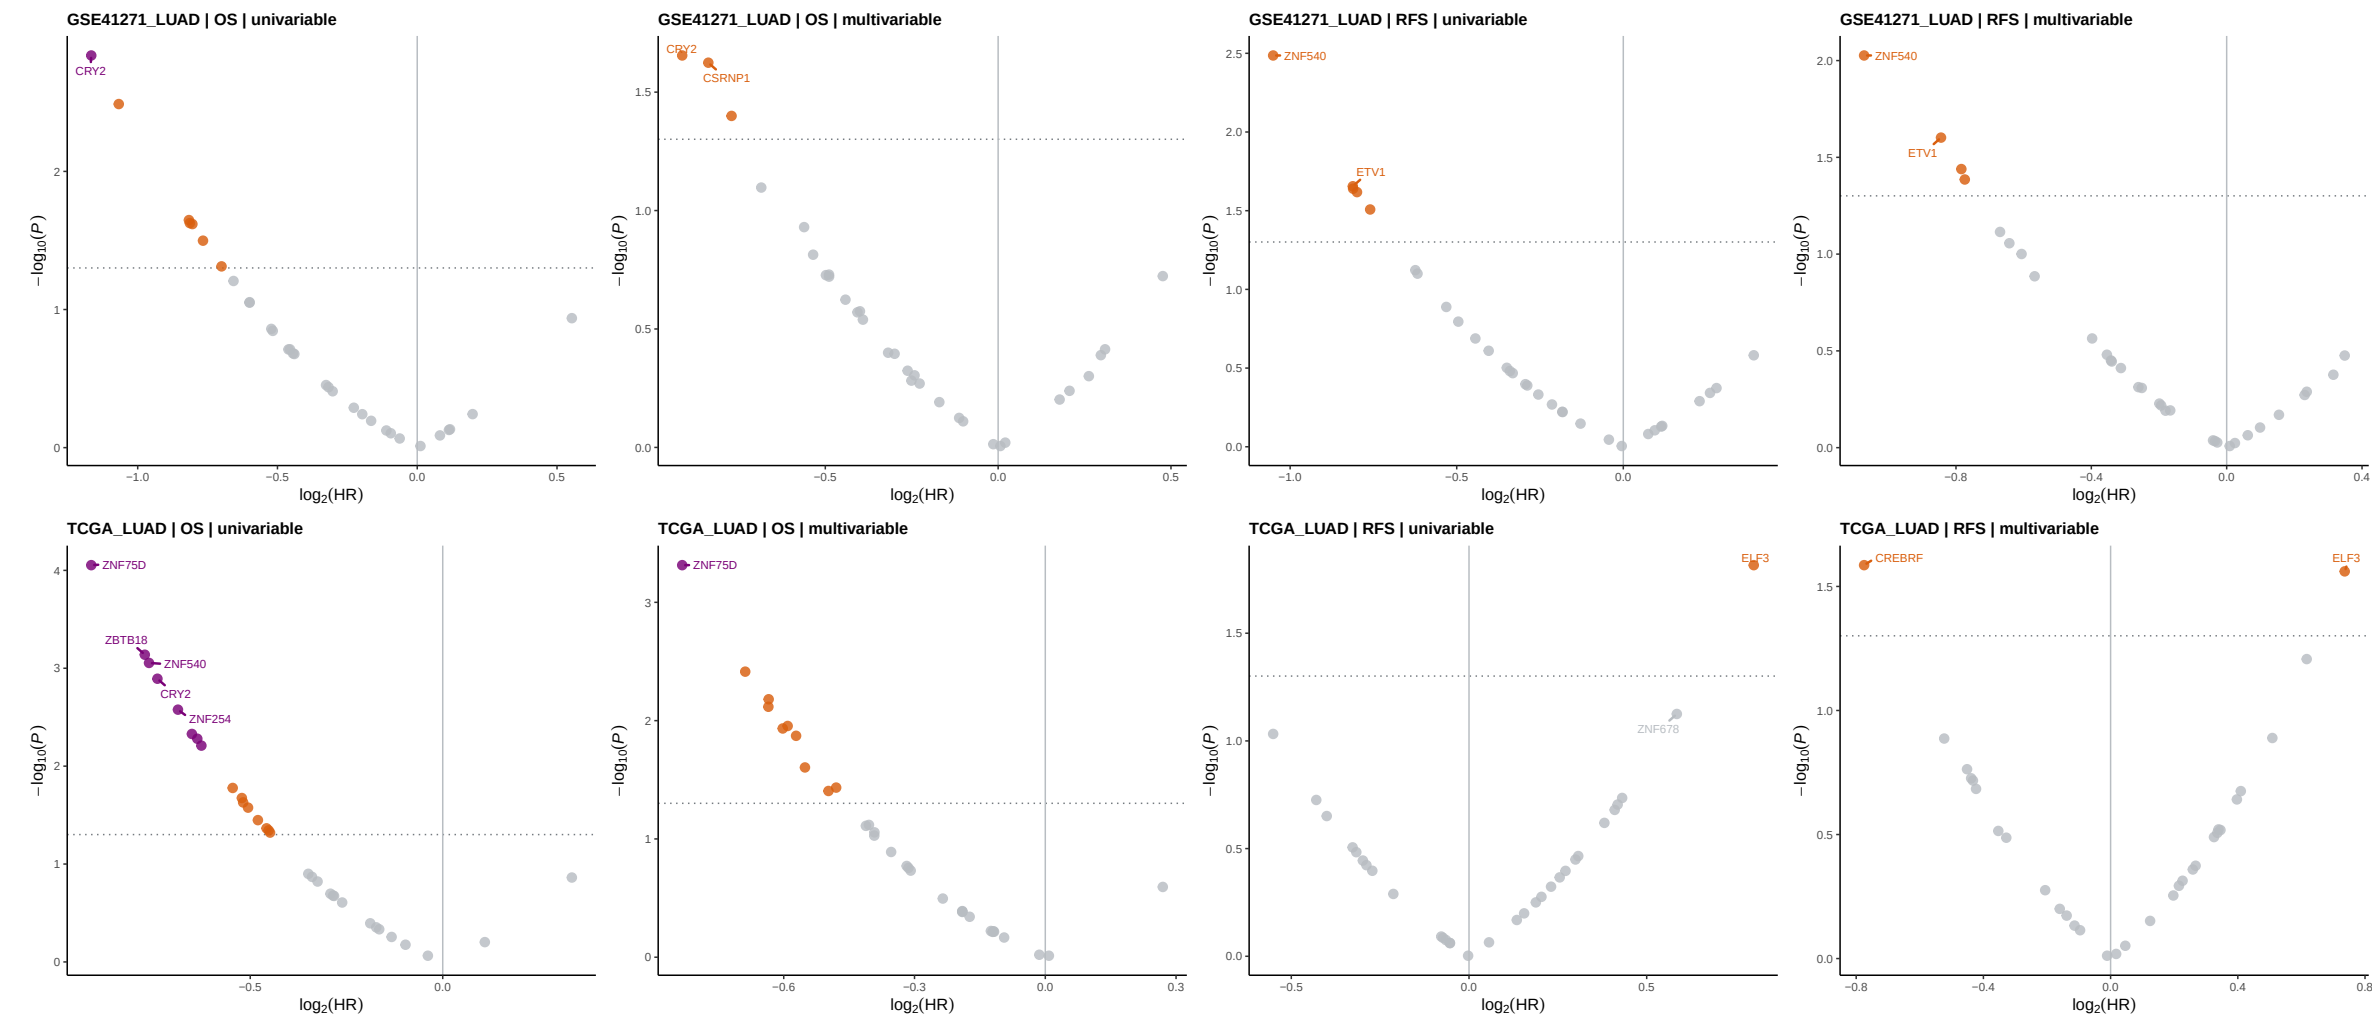

Star: |Pearson r|>0.4 and within-cohort BH FDR<=0.05

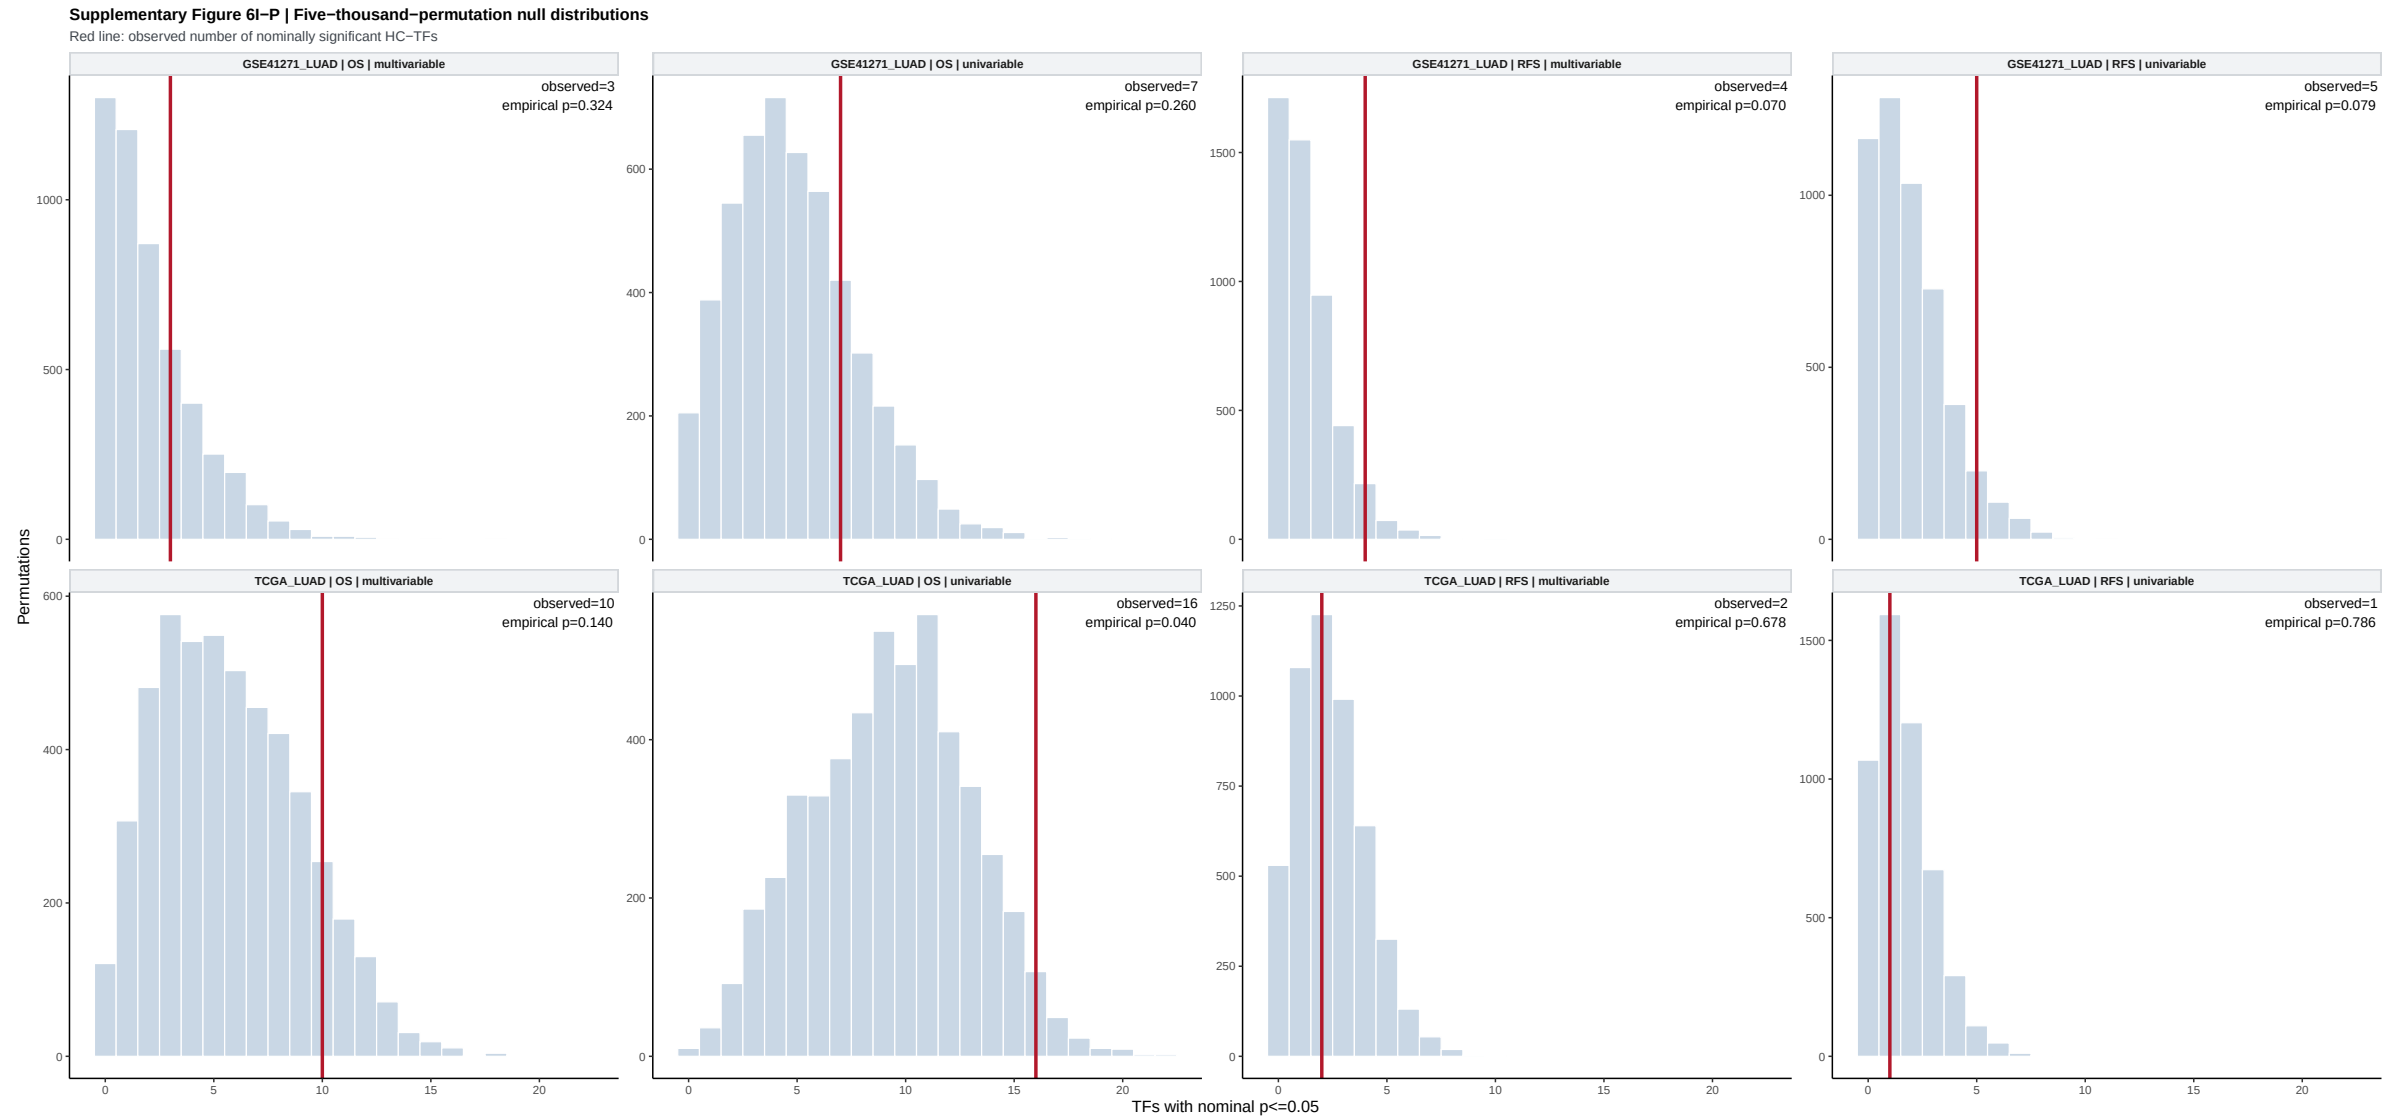

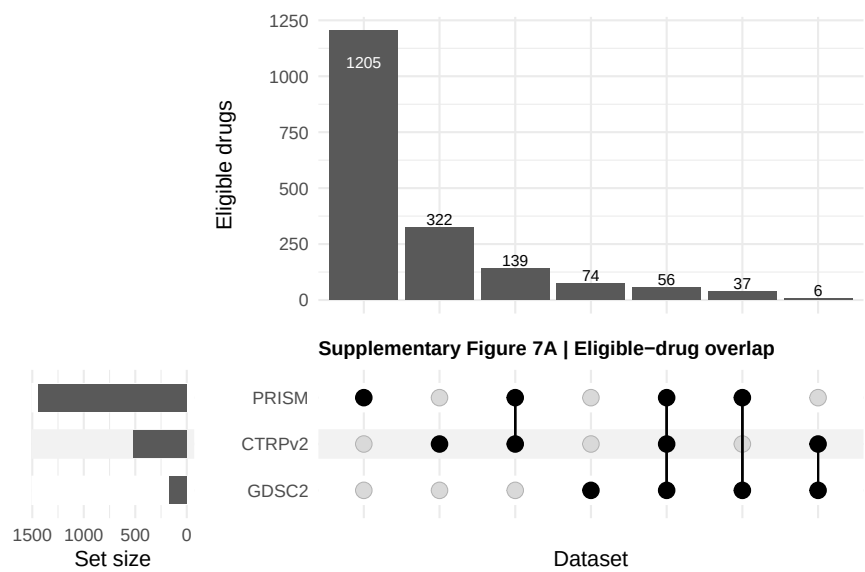

Supplementary Figure 6A-H | Continuous-activity Cox screens

Purple: BH FDR<=0.05; orange: nominal p<=0.05; all 31 HC-TFs are displayed

Supplementary Figure 7B | Replicated association examples
Every contributing dataset is shown; response is AAC
